

Virtana Cost & Capacity Management Solution Brief

Enhance Your Edge with Smarter Hybrid Infrastructure Scaling

Introduction

As organizations grow, their hybrid infrastructure—spanning cloud and on-premises environments—expands in complexity, driving up costs and resource demands. Effectively managing costs and capacity requires more than simplification; it requires intelligent scaling that turns complexity into a strategic advantage. IT leaders need real-time visibility and tools that streamline management and optimize their hybrid environment for both performance and cost efficiency.

Is PowerStore the destination for your mission-critical applications? Leverage Virtana’s agentless, high-fidelity data collection and analytics to contextualize your workloads and enable data driven decisions for your Private, Public & Multi-Cloud digital transformation initiatives.

The Solution: Virtana Cost & Capacity Management

Real-Time Optimization with Up to 145% ROI

Virtana Cost & Capacity Management empowers IT leaders to optimize hybrid infrastructure scaling with real-time data and analytics, helping businesses intelligently manage both costs and capacity. By delivering complete visibility into infrastructure expenses, Virtana enables you to identify and eliminate unused resources without impacting performance, even as workloads change. Continuous optimization means fewer surprises and more opportunities for long-term savings, including up to 145% ROI over three years.

Cost Management Overview

Download

Cloud: AWS, AZURE, GCP

Cost Summary

September Cost

\$190,628 ↓ -24.3%

Projected Month Total

\$0

■ Last month as of Aug 25: \$251,762 ■ Last month total: \$305,526

With Virtana Cost & Capacity Management, you can:

Demystify Costs

Complex pricing and capacity variables obscure cost drivers. Virtana simplifies this with bill analysis and cost vs. utilization reports that provide granular insights, trend comparisons, and alerts, helping you stay ahead of unexpected expenses.

Rightsize Efficiently

Optimizing workloads across numerous configurations is challenging. Virtana's automatic rightsizing recommendations and what-if analysis help you fine-tune your environment and ensure capacity requirements align with your organization's risk tolerance.

Eliminate Waste

Unused resources, such as idle compute instances and unattached storage blocks, often go unnoticed and drive up costs. Virtana's idle resource reports help you identify and eliminate these inefficiencies, keeping your budget under control by reducing waste.

Key Capabilities

Optimize for Lasting Savings

Virtana Cost & Capacity Management equips IT leaders with the insights needed to confidently identify cost-saving opportunities. Whether focusing on public cloud or on-premises infrastructure, this solution helps you make data-driven decisions that provide a competitive edge by optimizing costs and eliminating inefficiencies.

Cost & Capacity Savings Dashboard

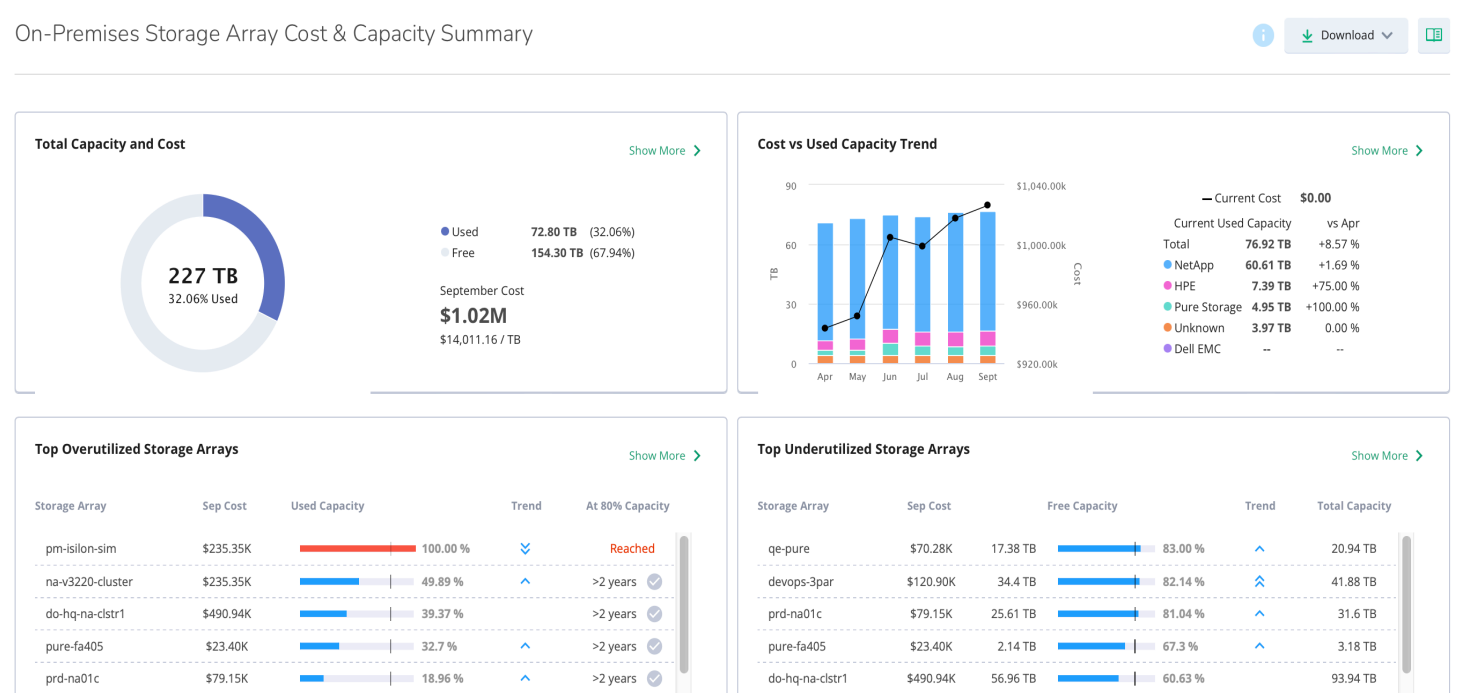

Instantly gain insights into potential savings for both cloud services (AWS, Azure, and GCP) and on-premises infrastructure. The dashboard provides detailed recommendations and allows you to set policies to balance performance and cost according to your risk tolerance.

Bill Analysis Report

Detailed insights into your cloud spend allow you to identify unexpected cost jumps and segment data for a deeper understanding of where your expenses are allocated.

Cost vs. Utilization

Per-instance visibility into spend and performance helps you effectively manage programmatic discounts and data transfer costs.

Why Virtana

Proven Expertise

Virtana has a track record of success managing some of the world's most complex IT environments.

Flexible Deployment Options

Choose between cloud-based SaaS or on-premises deployments to fit your unique requirements.

Deep Infrastructure Insights

Gain unparalleled visibility into your hybrid infrastructure, empowering you to make better decisions faster.

Security-First Approach

Virtana is committed to the highest security standards. Learn more about our software security policy at [[Virtana Software Security Policy](#)].

Take the Next Step

Transform your hybrid infrastructure management with Virtana Cost & Capacity Management. Contact us to learn how our solution can help you:

- Optimize infrastructure costs
- Reduce operational complexity
- Capture long-term savings
- Operate more efficiently
